

**Turn-Key Pipeline Services B.V.** is a Dutch company active in the exiting world of the oil and gas industry. We specialize in the world-wide supply of turnkey pipe coating installations for pipelines. Our organization can be characterized as project-oriented, hard working, innovative, having a fresh approach, and a pro-active customer support. We are located in Goor, in the green heart of the province of Overijssel. TKPS also has subsidiaries in St. Petersburg and Chelyabinsk, Russia. More information can be found at [www.tk-ps.com](http://www.tk-ps.com).

Because of our ongoing growth, we are looking for:

### ***(Senior) Mechanical Project Engineers***

The mechanical project engineer will be responsible for the mechanical design of (a part of) the production lines.

This means technical sales support, calculations, design, purchase specification as well as project coordination during realization and installation.

In short: Responsible from sales to commissioning and service.

#### Your profile:

The right candidate will have:

- At least a few years experience with the described tasks in a machine building environment;
- Experience with Autocad and 3D CAD software, preferably Solid Works;
- The drive to deliver technically complex projects within budget and time;
- An HBO / Bachelor level, through education or experience

Because of the international setting you have to be fluent in Dutch and English, willing to travel occasionally and must have a driver's license.

Interested? Then we are interested in you!

Please send us your resume at:
